

Select Meta-data File

The screenshot shows a Windows-style window titled "Data Integration Wizard". On the left is a vertical sidebar with a list of steps: "Welcome", "Data Source", "Database", "Select Meta-data File" (which is highlighted), "Options", "Processing", "Mapping", "Processing", and "Result". The main area of the window is titled "Select Meta-data File". It contains a label "Meta-data file:" followed by a text input field containing the path "D:\PMCubeExplorer\Metadadata\BPI2017.mddefault". To the right of the input field is a small gear icon. At the bottom of the window are four buttons: "Cancel", "< Back", "Next >", and "Finish".

On the *Select Meta-data File* page, you need to chose the meta-data file, that describes the structure of the data cube in the previously selected database.

Next Steps
