Text Functions

To use these functions, the Text Feature is required

- Soundex(String s)
- ColognePhonetic(String s)
- Metaphone(String s)
- Levenstein(String s1, String s2)

Soundex(String s)

Computes the Soundex value of the string.

Example

```
SELECT soundex("Hello") FROM Stream
=> "H400"
```

ColognePhonetic(String s)

Computes the Cologne Phonetic value of the string.

Example

```
SELECT colognePhonetic("Hello") FROM Stream
=> "05"
```

Metaphone(String s)

Computes the Metaphone value of the string.

Example

```
SELECT metaphone("Hello") FROM Stream
=> "HL"
```

Levenstein(String s1, String s2)

Computes the Levenstein Distance of two strings.

Example

```
SELECT levenstein("Hello", "Hallo") FROM Stream
=> 1
```
