

UDPClient transport handler

The UDPClient transport handler allows the delivery of results over UDP/IP to an arbitrary host. This transport handler can only be used in one direction, to publish data over UDP.

Options

- **host**: The host/IP of the target
- **port**: The port of the target system
- **write**: The size of the write buffer (optional)

Example

PQL

UDPClient Transport Handler
<pre>output = SENDER({sink='Sink', wrapper='GenericPush', transport='UDPClient', protocol='CSV', dataHandler='Tuple', options=[['host', 'example.com'], ['port', '8080'], ['write', '10240']] }, input)</pre>

CQL

UDPClient Transport Handler
<pre>CREATE SINK sink (id Double, data STRING) WRAPPER 'GenericPush' PROTOCOL 'CSV' TRANSPORT 'UDPClient' DATAHANDLER 'Tuple' OPTIONS ('host' 'example.com', 'port' '8080', 'read' '10240', 'write' '10240')</pre>
