

# BSON protocol handler

The BSON protocol handler parses [BSON](#) documents.

## Options

none

## Example

### PQL

#### JSONProtocolHandler

```
json = ACCESS({  
  source='json',  
  wrapper='GenericPull',  
  transport='File',  
  protocol='BSON',  
  dataHandler='KeyValueObject',  
  options=[['filename', 'scrobbles-2006-10.json']]  
})
```
